

3.12.2 Rejection of Authorisation

Authorisation may be rejected, for example if the PNR has already been ticketed:

Example:

```
SSR AUTK LH NO/23491193
SSR AUTK LH NO/23491193-1LAYR/GISELA MS. ALREADY TICKETED
```

3.13 MANDATORY FARE QUOTE AND ENFORCED TICKET TIME LIMIT — TIME LIMIT AUTO CANCEL *(for Exemption)*

Based on RP1768a — Mandatory Fare Quote and Enforced Ticket Time Limit, a Member may exempt a PNR from automatic cancellation by a Member/CRS.

Components of this SSR are:

- (a) Supplementary Item Identifier SSR;
- (b) Special Service Requirement Code TLAC;
- (c) Action Identifier — enter the airline designator of the airline/CRS to take action;
- (d) Oblique
- (e) The airline designator of the airline authorising the exemption;
- (f) The word EXEMPT
- (g) Free text area (optional) — shall be preceded by a period (,).

Example of airline exempting a CRS auto cancel of inventory:

```
SWIRM1G
.AMSRMKL 121314
SWI1G ABC472
2VANDERGOOT/MR/MRS
KL652B14APR IADAMS HK2
KL341B15APR AMSGVA HK2
SSR TLAC 1G/KL EXEMPT.DUE TO SCHEDULE CHANGE
```

Note: *Inclusion of the air segments is optional.*

□ 3.14 ADVANCED PASSENGER INFORMATION — API *(bilateral agreement only)*

Information may be exchanged when a passenger/crew is travelling on an international segment(s). The supplementary element — Special Service Requirement (SSR) — follows the general construction rules as stated in 2.11 through 2.11.5.13.

Separate SSR items are required for each passenger and crew member, if applicable.

SSRs may be segment associated using automated format or may apply to all segments for the actioned carrier using non-automated format.

Airline code “YY” is not permitted.

The agreed maximum set of data elements for the transmission of the advanced passenger information (API), as defined by the WCO/IATA/ICAO Advanced Passenger Information Guidelines (Section 8), are summarised as follows:

Data relating to each individual passenger and crew member:

- Official Travel Document Number;
- Issuing State or Organization of the Official Travel Document;
- Official Travel Document Type;
- Expiration Date of Official Travel Document;
- Surname/Given Name(s);
- Nationality;

Date of Birth;
Gender;
Visa Number;
Issue Date of the Visa;
Place of Issuance of the Visa;
Other Document Number Used for Travel;
Type of Other Document Used for Travel;
Residence Address:
 Address,
 City,
 State/Province/Country,
 Postal Code,
 Country;
Destination Address:
 Address,
 City,
 State/Province/Country,
 Postal Code;
Place of Birth;
Country of Primary Residence.

Transmission of API data elements to Border Control Authorities will be provided using the WCO/IATA/ICAO EDIFACT Passenger List Message (PAXLST). Date formats must follow the agreed standard YYMMDD and Country/State Codes must follow the ISO 3166/ICAO 9303 three alphabetic format.

Further information regarding Section 3.14 Advanced Passenger Information can be obtained by contacting the Editor of AIRIMP at email address: airimp@iata.org.

Definitions:

EDIFACT: Electronic Data Interchange for Administration, Commerce and Transport
ICAO 9303: International Civil Aviation Organization
 9303 Machine Readable Travel Documents
ISO 3166: International Organization for Standardization
 3166-1 Country Codes
 3166-2 Country Sub-division Codes
 3166-3 Codes for formally used names of countries
MRZ: Machine Readable Zone (ICAO 9303)
WCO/IATA PAXLST: A subset of the UN/EDIFACT Passenger List Message (PAXLST) designed for multi-modal, multi-functional message
WCO: World Customs Organization.

Components — Character Type:

Standardised symbols are used in the sequence of components to describe character formats. The symbols and their meaning are detailed below:

- a represents alphabetic character(s)
- n represents numeric character(s)
- an represents alpha-numeric character(s)

Example: 2an — represents two alpha-numeric characters

3.14.1 API — Passenger/Crew Primary Travel Document Information (bilateral agreement only)

Elements (m) Travel Document Surname, (n) Travel Document First Given Name and (o) Travel Document Second Given Name must match the surname, first given name and second given name (if applicable) as shown in the travel document.

3.14.1.1 Definitions

The following travel documents have been defined by ICAO 9303:

Approved non-standard identity documents used for travel (as defined by the issuing Country/State)	F
Crew Member Certificate	AC
Identity Card (as defined by the issuing Country/State)	A
Identity Card (as defined by the issuing Country/State)	C
Identity Card (as defined by the issuing Country/State)	I
Passport Card	IP
Passenger Passport	P

Countries/States may approve other documents as identification for travel use.

Visa information is considered secondary document information and is supplied using SSR DOCO.

The data capture of the MRZ date formats (YYMMDD) must be converted to AIRIMP standards (DDMMYY) prior to the transmission of the SSR element.

The data capture of MRZ Country/State Code (3 alphabetic) may need to be converted to the AIRIMP standards of 1-3 alphabetic characters and converted back to the 3 alphabetic code (aaa) when using the WCO/IATA PAXLST message.

3.14.1.2 Construction Rules and Sequence of Components — Non-Automated Format

An oblique (/) is inserted between each of the elements following (d) Status Code. Where components of the document information are not provided, an oblique (/) is inserted to indicate an element is missing. This is not required when no further components are provided.

Components	Number and Type of Characters	Example
(a) Supplementary Identifier (Mandatory)	3a	SSR
(b) Special Service Requirement Code (Mandatory)	4a	DOCS
(c) Airline Designator (Mandatory)	2an or 3a	AA or /ABC
(d) Status Code (Mandatory)	2a	HK
(e) Number in Party (Mandatory)	1n	1
(f) Travel Document Type (Mandatory)	1-2a	I
(g) Travel Document Issuing Country/State (Mandatory)	1-3a	USA
(h) Travel Document Number (Mandatory)	Max. 15an	D23145890

Components	Number and Type of Characters	Example
(i) Passenger/Crew Nationality (Mandatory)	1-3a	USA
(j) Date of Birth DDMMYY (Mandatory)	7an	12JUL64
(k) Gender of Passenger/Crew F = female, M = male, FI = female infant, MI = male infant and U = Undisclosed Gender (Mandatory)	1-2a	M
(l) Travel Document Expiry Date DDMMYY (Mandatory)	7an	12JUL04
(m) Travel Document Surname (Mandatory)	Max. 30a	STEVENSON
(n) Travel Document First Given Name (Mandatory if present on travel document)	Max. 30a	JOHN
(o) Travel Document Second Given Name (Conditional)	Max. 30a	RICHARD
(p) If multi-passenger passport and this SSR is for the primary passport holder, include the letter (H) (Conditional)	1a	H
(q) Name Information (Conditional: If the primary travel document information does not apply to all passengers in the PNR, follow with a hyphen and passenger name field for whom the element applies.)		
(i) Hyphen (-) (Mandatory)	<i>Hyphen</i>	-
(ii) PNR Associated Name Including number in party (Mandatory)		1STEVENSON/ JOHNM

3.14.1.3 Construction Rules and Sequence of Components — Automated Format

An oblique (/) is inserted between each of the elements following (f) *Segment*. Where components of the document information are not provided, an oblique (/) is inserted to indicate an element is missing. This is not required when no further components are provided.

Components	Number and Type of Characters	Example
(a) Supplementary Identifier (Mandatory)	3a	SSR
(b) Special Service Requirement Code (Mandatory)	4a	DOCS
(c) Airline Designator (Mandatory)	2an or 3a	AA or /ABC
(d) Status Code (Mandatory)	2a	HK
(e) Number in Party (Mandatory)	1n	1

Reservations Interline Message Procedures — Passenger (AIRIMP)

Components	Number and Type of Characters	Example
(f) Segment: The segment and flight data must be the same as shown in a segment element (Mandatory)		
(i) Boarding Point	3a	LHR
(ii) De-planing Point	3a	JFK
(iii) Flight Number	4n	0234
(iv) Class of Service	1a	F
(v) Date (DDMMM)	5an	03OCT
(g) Travel Document Type (Mandatory)	1-2a	I
(h) Travel Document Issuing Country/State (Mandatory)	1-3a	USA
(i) Travel Document Number (Mandatory)	Max. 15an	D23145890
(j) Passenger/Crew Nationality (Mandatory)	1-3a	USA
(k) Date of Birth DDMMYY (Mandatory)	7an	12JUL64
(l) Gender of Passenger/Crew F = female, M = male, FI = female infant, MI = male infant and U = Undisclosed Gender (Mandatory)	1-2a	M
(m) Travel Document Expiry Date DDMMYY (Mandatory)	7an	12JUL04
(n) Travel Document Surname (Mandatory)	Max. 30a	STEVENSON
(o) Travel Document First Given Name (Mandatory if present on travel document)	Max. 30a	JOHN
(p) Travel Document Second Given Name (Conditional)	Max. 30a	RICHARD
(q) If multi-passenger passport and this SSR is for the primary passport holder, include the letter (H) (Conditional)	1a	H
(r) Name Information (Conditional: If the primary travel document information does not apply to all passengers in the PNR, follow with a hyphen and passenger name field for whom the element applies.)		
(i) Hyphen (-) (Mandatory)	<i>Hyphen</i>	-
(ii) PNR Associated Name Including number in party (Mandatory)		1STEVENSON/ JOHNMR

3.14.1.4 Examples

(a) Non-Automated Format (1)

Mr. John Stevenson is travelling with an American identity card number D23145890.

Note: This example has been split into two lines as the first line exceeds the maximum limit of 69 characters. Refer to section 2.11.5 — General Construction Rules.

```
SSR DOCS AA HK1/I/USA/D23145890/USA/12JUL64/M/12JUL04/STEVENS0N/
SSR DOCS AA ///JOHN/RICHARD-1STEVENS0N/JOHNMR
```

Automated Format (2)

Mr. John Stevenson is travelling with an American identity card number D23145890 and a Singaporean Passport number S78654091.

Note: These example have been split into two lines as the first line exceeds the maximum limit of 69 characters. Refer to section 2.11.5 — General Construction Rules.

```
SSR DOCS BA HK1MADLHR0455Y28JUN/P/SIN/S78654091/SIN/12JUL64/M/230CT05/
SSR DOCS BA ///STEVENS0N/JOHN/RICHARD-1STEVENS0N/JOHNMR

SSR DOCS NZ ///PEERS/PETER/ERIC-1PEERS/PETERMSTR
```

(c) Cancellation — Non-Automated Format (1)

Example of an SSR item cancelling primary travel document:

```
SSR DOCS NZ XX1/P/NZL/P13248721/NZL/15NOV61/F/15NOV05/PEERS/MARLA/
SSR DOCS NZ ///H-1PEERS/MARLAMS
```

Cancellation — Automated Format (2)

Example of an SSR item cancelling primary travel document:

```
SSR DOCS NZ XX1MADLHR0455Y28JUN/P/NZL/P13248721/NZL/15NOV61/F/15NOV05/
SSR DOCS NZ ///PEERS/MARLA/H-1PEERS/MARLAMS
```

3.14.2 API — Passenger/Crew Other Travel Related Information *(bilateral agreement only)*

3.14.2.1 Definitions

Visa and Place of Birth the elements that may be included as part of the other travel related information.

A Visa is considered a secondary travel document and must be used in conjunction with a primary document such as a Passport.

Element *(f) Passenger/Crew Place of Birth* requires manual data capture methods as it is located in the visual zone of a passport and is identified using the full place name. Place of Birth may also include the country code.

The data capture of the MRZ date formats (YYMMDD) must be converted to AIRIMP standards (DDMMYY) prior to the transmission of the SSR element and converted back to YYMMDD when using the WCO/IATA PAXLST message.

The data capture of MRZ Country/State Code (3 alphabetic) may need to be converted to the AIRIMP standards of 1-3 alphabetic characters and converted back to the 3 alphabetic code (aaa) when using the WCO/IATA PAXLST message.

Element *(j) Visa issuing Country/State* must be provided in situations where a passenger is travelling to two or more Countries/States requiring separate Visa documents. This element is a data collection requirement and is needed in order to provide the correct Visa information for the relevant Country/State information.

3.14.2.2 Construction Rules and Sequence of Components — Non-Automated Format

An oblique (/) is inserted between each of the elements following *(d) Status Code*. Where the components of the other travel related information are not provided, an oblique (/) is inserted to indicate an element is missing. This is not required when no further components are provided.

Components	Number and Type of Characters	Example
(a) Supplementary Identifier (Mandatory)	3a	SSR
(b) Special Service Requirement Code (Mandatory)	4a	DOCO
(c) Airline Designator (Mandatory)	2an or 3a	AC or /ABC
(d) Status Code (Mandatory)	2a	HK
(e) Number in Party (Mandatory)	1n	1
(f) Passenger/Crew Place of Birth (Optional)	Max. 35a	AMBER HILL GBR
(g) Travel Document Type ICAO 9303 = V (Mandatory if Visa data is present)	1a	V
(h) Visa Document Number (Mandatory for Visa only)	Max. 15an	9891404
(i) Visa Document Place of Issue (Mandatory for Visa only)	Max. 35a	LONDON
(j) Visa Document Issue Date DDMMYY (Mandatory for Visa only)	7an	14MAR03

Components	Number and Type of Characters	Example
(k) Country/State for which the Visa is applicable (Mandatory for Visa only)	1-3a	USA
(l) Infant Indicator I = Infant (Mandatory if an infant not occupying seat)	1a	I
(m) Name Information (Conditional: If the other travel related information does not apply to all passengers in the PNR, follow with a hyphen and passenger name field for whom the element applies.)		
(i) Hyphen (-) (Mandatory)	<i>Hyphen</i>	-
(ii) PNR Associated Name Including number in party (Mandatory)		1STEVENSON/ JOHNMR

3.14.2.3 Construction Rules and Sequence of Components — Automated Format

An oblique (/) is inserted between each of the elements following (d) *Status Code*. Where the components of the other travel related information are not provided, an oblique (/) is inserted to indicate an element is missing. This is not required when no further components are provided.

Components	Number and Type of Characters	Example
(a) Supplementary Identifier (Mandatory)	3a	SSR
(b) Special Service Requirement Code (Mandatory)	4a	DOCO
(c) Airline Designator (Mandatory)	2an or 3a	AC or /ABC
(d) Status Code (Mandatory)	2a	HK
(e) Number in Party (Mandatory)	1n	1
(f) Segment: The segment and flight data must be the same as shown in a segment element (Mandatory)		
(i) Boarding Point	3a	LHR
(ii) De-planing Point	3a	JFK
(iii) Flight Number	4n	0234
(iv) Class of Service	1a	F
(v) Date (DDMMM)	5an	03OCT
(g) Passenger/Crew Place of Birth (Optional)	Max. 35a	AMBER HILL GBR
(h) Travel Document Type ICAO 9303 = V (Mandatory if Visa data is present)	1a	V
(i) Visa Document Number (Mandatory for Visa only)	Max. 15an	9891404
(j) Visa Document Place of Issue (Mandatory for Visa only)	Max. 35a	LONDON

Reservations Interline Message Procedures — Passenger (AIRIMP)

Components	Number and Type of Characters	Example
(k) Visa Document Issue Date DDMMYY (Mandatory for Visa only)	7an	14MAR03
(l) Country/State for which the Visa is applicable (Mandatory for Visa only)	1-3a	USA
(m) Infant Indicator I = Infant (Mandatory if an infant not occupying seat)	1a	I
(n) Name Information (Conditional: If the other travel related information does not apply to all passengers in the PNR, follow with a hyphen and passenger name field for whom the element applies.)		
(i) Hyphen (-) (Mandatory)	<i>Hyphen</i>	-
(ii) PNR Associated Name Including number in party (Mandatory)		1STEVENSON/ JOHNMR

3.14.2.4 Examples

(a) Non-Automated Format (1)

A passenger requiring two Visa documents for this PNR:

```
SSR D0C0 BA HK1//V/9891404/LONDON/14MAR03/USA-1STEVENSON/JOHNMR
SSR D0C0 BA HK1//V/586D4FF/WASHINGTON/23AUG01/GBR-1STEVENSON/JOHNMR
```

Automated Format (2)

A passenger requiring two Visa documents for this PNR:

```
SSR D0C0 BA HK1MADLHR0455Y28JUN//V/9891404/LONDON/14MAR03/
SSR D0C0 BA ///USA-1STEVENSON/JOHNMR
SSR D0C0 BA HK1MADLHR0455Y28JUN//V/586D4FF/WASHINGTON/23AUG01/
SSR D0C0 BA ///GBR-1STEVENSON/JOHNMR
```

(b) Non-Automated Format (1)

A passenger indicating they were born in Amber Hill, United Kingdom:

```
SSR D0C0 BA HK1/AMBER HILL GBR-1STEVENSON/JOHNMR
```

Automated Format (2)

A passenger indicating they were born in Amber Hill, United Kingdom:

```
SSR D0C0 BA HK1MADLHR0455Y28JUN/AMBER HILL GBR-1STEVENSON/JOHNMR
```

(c) Non-Automated Format (1)

A passenger travelling with infants — Passenger Ms Marla Peers with VISA number 9891555, is travelling in the company of infant Stessamae Peers (not occupying seat) with VISA number 9891666, and Peter Peers (occupying seat) with VISA number 9891777:

```
SSR D0C0 BA HK1//V/9891555/LONDON/14MAR03/USA-1PEERS/MARLAMS
SSR D0C0 BA HK1//V/9891666/LONDON/14MAR03/USA/I-1PEERS/MARLAMS
SSR D0C0 BA HK1//V/9891777/LONDON/14MAR03/USA-1PEERS/PETERMSTR
```

Automated Format (2)

A passenger travelling with infants — Passenger Ms Marla Peers with VISA number 9891555, is travelling in the company of infant Stessamae Peers (not occupying seat) with VISA number 9891666, and Peter Peers (occupying seat) with VISA number 9891777:

```

```

3.14.3 API — Passenger/Crew Address Information *(bilateral agreement only)*

3.14.3.1 Definitions

The passenger/crew address information is defined by type:

Residence address = R
Destination address = D

3.14.3.2 Construction Rules and Sequence of Components — Non-Automated Format

An oblique (/) is inserted between each of the elements following (d) *Status Code*. Where the components of the address information are not provided, an oblique (/) is inserted to indicate an element is missing. This is not required when no further components are provided.

The (i) *City* element must be provided and should be identified using the full city name given that Border Control Authorities will require full city names.

The following elements must be provided if available: (h) *Address Details*, (j) *State/Province/Country*, (k) *Zip Code/Postal Code*.

The (j) *State/Province/Country* element should be identified using ISO 3166-2 Country Sub-Division Codes or as Free Text.

Components	Number and Type of Characters	Example
(a) Supplementary Identifier (Mandatory)	3a	SSR
(b) Special Service Requirement Code (Mandatory)	4a	DOCA
(c) Airline Designator (Mandatory)	2an or 3a	C0 or /ABB
(d) Status Code (Mandatory)	2a	HK
(e) Number in Party (Mandatory)	1-3n	1
(f) Type of Address D = destination, R = residence (Mandatory)	1a	R
(g) Country (Mandatory)	1-3a	USA
(h) Address Details (Optional)	Max. 35an	1600 SMITH STREET
(i) City (Mandatory)	Max. 35a	HOUSTON
(j) State/Province/Country (Optional)	Max. 35a	TX
(k) Zip Code/Postal Code (Optional)	17an	77001
(l) Infant Indicator I = Infant (Mandatory if an infant not occupying seat)	1a	I
(m) Name Information (Conditional: If the address information does not apply to all passengers in the PNR, follow with a hyphen and passenger name field for whom the element applies.)		
(i) Hyphen (-) (Mandatory)	<i>Hyphen</i>	-
(ii) PNR Associated Name Including number in party (Mandatory)		1STEVENSON/ JOHNMR

3.14.3.3 Construction Rules and Sequence of Components — Automated Format

An oblique (/) is inserted between each of the elements following (f) *Segment*. Where the components of the address information are not provided, an oblique (/) is inserted to indicate an element is missing. This is not required when no further components are provided.

The (j) *City* element must be provided and should be identified using the full city name given that Border Control Authorities will require full city names.

The following elements must be provided if available: (i) *Address Details*, (k) *State/Province/Country*, (l) *Zip Code/Postal Code*.

The (k) *State/Province/Country* element should be identified using ISO 3166-2 Country Sub-Division Codes or as Free Text.

Components	Number and Type of Characters	Example
(a) Supplementary Identifier (Mandatory)	3a	SSR
(b) Special Service Requirement Code (Mandatory)	4a	DOCA
(c) Airline Designator (Mandatory)	2an or 3a	CO or /ABB
(d) Status Code (Mandatory)	2a	HK
(e) Number in Party (Mandatory)	1-3n	1
(f) Segment: The segment and flight data must be the same as shown in a segment element (Mandatory)		
(i) Boarding Point	3a	LHR
(ii) De-planing Point	3a	JFK
(iii) Flight Number	4n	0234
(iv) Class of Service	1a	F
(v) Date (DDMMM)	5an	03OCT
(g) Type of Address D = destination, R = residence (Mandatory)	1a	R
(h) Country (Mandatory)	1-3a	USA
(i) Address Details (Optional)	Max. 35an	1600 SMITH STREET
(j) City (Mandatory)	Max. 35a	HOUSTON
(k) State/Province/Country (Optional)	Max. 35a	TX
(l) Zip Code/Postal Code (Optional)	17an	77001
(m) Infant Indicator I = Infant (Mandatory if an infant not occupying seat)	1a	I
(n) Name Information (Conditional: If the address information does not apply to all passengers in the PNR, follow with a hyphen and passenger name field for whom the element applies.)		
(i) Hyphen (-) (Mandatory)	<i>Hyphen</i>	-
(ii) PNR Associated Name Including number in party (Mandatory)		1STEVENSON/ JOHNMR

3.14.3.4 Examples

(a) Non-Automated Format (1)

A passenger's residence address is 1600 Smith Street, Houston, Texas 77001, United States of America:

```
SSR DOCA CO HK1/R/USA/1600 SMITH STREET/HOUSTON/TX/77001
```

Automated Format (2)

A passenger's residence address is 1600 Smith Street, Houston, Texas 77001, United States of America:

```
SSR DOCA CO HK1MADLHR0455Y28JUN/R/USA/1600 SMITH STREET/HOUSTON/TX/  
SSR DOCA CO ///77001
```

(b) Non-Automated Format (1)

A crew member's residence address is 111 Viale Alessandro Marchetti, Rome 148, Italy:

```
SSR DOCA AZ HK1/R/ITL/111 VIALE ALESSANDRO MARCHETTI/ROME//148
```

Automated Format (2)

A crew member's residence address is 111 Viale Alessandro Marchetti, Rome 148, Italy:

```
SSR DOCA AZ HK1MADLHR0455Y28JUN/R/ITL/111 VIALE ALESSANDRO  
SSR DOCA AZ ///MARCHETTI/ROME//148
```

3.15 ELECTRONIC PAYMENT AUTHORISATION *(as bilaterally agreed)*

3.15.1 Electronic payment authorisation data may be exchanged when an airline supports electronic payment for ticketless travel and related travel services. The data received is evaluated by the receiving system. A reply message confirming or denying is sent back to the requesting system.

The format for exchanging this SSR item is as follows:

```
Supplementary Identifier .....SSR
Special Service Requirement Code .....EPAY
Action Identifier — airline participating in service ...TF
('YY' not permitted)
Action code followed by number in party
for request .....NN1
Payment type (2 character code) .....AP
Payment reference (preceded by an oblique) ...../123456789
Name (optionally) if not for all passengers .....- 1JONES/MARYMRS
(preceded by hyphen)
Free text (preceded by period) .....FREE TEXT
```

Valid payment types are:

- AP — Account payment;
- AC — Airline card;
- CC — Credit card;
- CP — Coupon payment;
- VP — Voucher payment.
